Hiring Manager

Wiley

Dear Hiring Manager,

I am writing to express my keen interest in the **Front-End Developer** position at **Wiley**. With a strong foundation in front-end technologies and a passion for creating elegant, user-focused interfaces, I am confident in my ability to contribute to Wiley's mission of advancing knowledge and learning through innovative digital solutions.

I hold a Bachelor's degree in Software Engineering from The Hashemite University and am currently completing an intensive full-stack development bootcamp at Orange Coding Academy. My experience includes building responsive and dynamic web applications using **React.js**, **Next.js**, **Tailwind CSS**, and **Redux**. I have developed and deployed several projects that demonstrate my ability to translate UI/UX designs into high-quality code, ensure performance optimization, and maintain cross-browser compatibility.

One of my most relevant projects is **Rivana Farm**, a property rental platform built with React and Firebase, where I focused on delivering a seamless user experience and efficient state management. Through such projects, I have honed not only my technical skills but also my ability to work in agile teams, communicate effectively, and solve problems creatively.

I am excited about the opportunity to join Wiley's innovative team and contribute to building impactful, user-centered digital experiences. I am confident that my technical skills, attention to detail, and eagerness to learn align well with the values and goals of your company.

Thank you for considering my application. I would be thrilled to discuss how I can support Wiley's digital development initiatives and bring value to your front-end team.

Sincerely,

Mustafa Obiedat
